5 (i). Description of efforts undertaken to reduce volume and toxicity:

CMC Steel Arizona exports this material to Zinc Nacional for the sole purpose of reclamation of the zinc metals contained therein. Its contracts with Zinc Nacional require a minimum of 20% zinc, approximately the same concentration of zinc in virgin ore. Zinc Nacional recovers the metal for use in pigments, medicines, and other commercial and industrial uses. The residues from the processing are non-hazardous. Therefore, after reclamation by Zinc Nacional, the hazardous waste volume is reduced to zero and the toxicity of all solid waste by-products is zero. CMC Steel Arizona reduces the volume of hazardous waste generated by managing hazardous waste in a manner in which contamination and/or additional hazardous waste is generated.

5 (ii). Description of changes in volume and toxicity achieved compared to previous years.

There have been no significant changes in volume or toxicity of the material.
